## **DETAILED ACTION**

### ***Response to Amendment***

1. This Office Action is responsive to the Amendment filed 4/24/07.
2. The Amendment filed 4/24/07 successfully overcomes the rejections set forth in paragraphs 2-4 of the Office Action mailed 1/24/07. Accordingly, these rejections are withdrawn.

### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 19 and 25-27 are rejected under 35 U.S.C. 102(e) as being anticipated by US 6,594,079 to Trott et al. (Trott) for the reasons of record as set forth in paragraph 5 of the Office Action mailed 1/24/07, and as further discussed below.

### ***Allowable Subject Matter***

4. Claims 5-12 are allowed.

Art Unit: 1756

5. Claims 20-24 and 28-30 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

### ***Response to Arguments***

6. Applicant's arguments filed 4/24/07 have been fully considered but they are not persuasive. With respect to the rejection over Trott, Applicant argues that this reference does not teach or suggest forming a photosensitive resin into a required shape by adjusting a distribution of exposure light in the photosensitive resin. However, Trott discloses utilizing bubble lenses **49** to cause the convergence of light rays **63** toward a focal point **65** (i.e. adjusting a distribution of exposure light) approximately in the middle of photoresist material **61**. See column 7, lines 14-19 and Figure 8.

### ***Conclusion***

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 1756

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
